

Modular Interiors Collection

Overview

A range of grid mounting outlets have been designed to reduce the need for a multitude of different outlets and can be matched with all other electrical accessory plates within the property to produce a modern, premium and coordinated finish.

Constant and rapid technological advancements have meant an increase in the numbers and types of outlets required in homes, offices and hotels.

Rather than having a variety of different wall plates for each outlet, multiple data and media outlets can be grouped together in one convenient plate, reducing the likelihood that an unsightly jumble of wires and cables will be left on display.

These are particularly useful when it comes to entertainment systems.

Features

Grid mounting outlets have been cleverly designed to allow bespoke outlet arrangement without the need for a specially designed custom unit.

Availability

All of our data, media and USB charger outlets can be used with all of our ranges of wiring accessory plates and can be specified to contain single or multiple outlets depending upon requirement.

Finishes

All of our modular interiors are available in single or multiple outlets and are supplied in either Black or White polycarbonate housings to complement the finish of the chosen plate.

Ordering

All modular interiors fit into our switch plates and grids, making them available across all of our collections. However, when ordering The Infinity Collection, the following grids must be used for installation.

G981/* - 1 Gang

G982/* - 2 Gang

G983/* - 3 Gang

G984/* - 4 Gang

When ordering state the catalogue number of the required module.

*Interior Finishes available:

Black and White
