

Speaker Grid Outlet

Description

The Banana connector has been designed to be used in conjunction with hi-fi sound systems to connect the amplifier to the loudspeakers.

The connector can also terminate patch cords for electronic test equipment.

Availability

All of our data, media and USB charger outlets can be used with all of our collections of wiring accessory plates and can be specified to contain single or multiple outlets depending upon requirement.

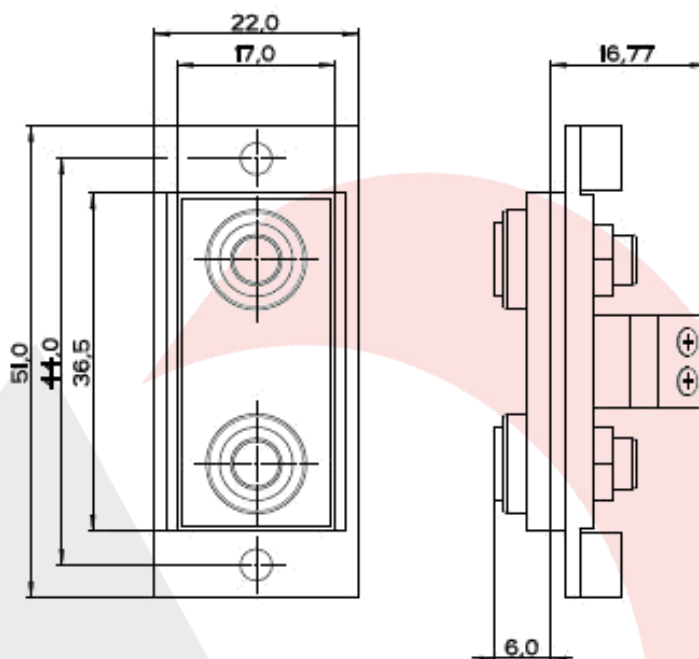

Single or multiple outlets are supplied in either Black or White polycarbonate housings to complement the finish of the chosen plate.

Features

- Uses a multi-board PCB with screw down terminal blocks, eliminating the need for solder irons on site during installation
- Speaker outlet (4mm/Banana socket) Red/Black sockets.

Recommended Box Depth:

35 mm
Metal boxes to BS4662.

Ordering

All modular interiors fit into our switch plates and grids, making them available across all of our collections. However, when ordering in The Infinity Collection, the following grids must be used for installation.

- G981/*** - 1 Gang
- G982/*** - 2 Gang
- G983/*** - 3 Gang
- G984/*** - 4 Gang

When ordering please state the catalogue number of the required module.
