

Euromod—Audio 3.5mm

Standards, Approvals & Directives

2011/65/EC—RoHS Directive

Description

The 3.5mm audio connector is used to transmit analog audio (mono/stereo) signals between two devices.

This is most commonly used as a headphone connector for MP3 players and small stereo systems but will often be found on PC sound cards and portable audio devices such as DVD players.

Features

- Screw terminals
- Clip-In Module for quick and easy installation
- Black or white modules available

Availability

All Euromod outlets are available for all our collections of wiring accessory plates and can be specified to contain single or multiple outlets depending upon requirement.

The Classic Collection takes advantage of plate mounting the clip-in Euromods, eliminating the use of a grid. Modules are supplied separately.

The Infinity Collection plates and grids are supplied together whereas the modules are supplied separately.

The Penthouse Collection supplies the Euromods, plates and grids individually.

Finishes

The module is supplied in either Black or White polycarbonate, complementing the chosen plate finish.

Recommended Box Depth:
35 mm
Metal boxes to BS4662.

Ordering

Interior Euro Module: 3606221 - White
3606222 - Black

Please see Wandsworth Electrical catalogue for more information and suitable grid and plate
