

Euromod—Component Video RCA (RGB)

Standards, Approvals & Directives

2011/65/EC—RoHS Directive

Description

The component video connector, often referred to as a “RGB” transmits a high quality analogue video signal between two devices.

The component video connector is split into three RCA connectors, red, green and blue. Often the connectors on the back of equipment will be marked YPbPr. This is referring to the three channels it is transmitting – Luma (brightness) and the two colour channels.

Features

- Screw terminals
- Clip-In Module for quick and easy installation
- Black or white modules available

Availability

All Euromod outlets are available for all our collections of wiring accessory plates and can be specified to contain single or multiple outlets depending upon requirement.

The Classic Collection takes advantage of plate mounting the clip-in Euromods, eliminating the use of a grid. Modules are supplied separately.

The Infinity Collection plates and grids are supplied together whereas the modules are supplied separately.

The Penthouse Collection supplies the Euromods, plates and grids individually.

Finishes

The RCA module is supplied in either Black or White polycarbonate, complementing the chosen plate finish.

Recommended Box Depth:
35 mm
Metal boxes to BS4662.

Ordering

Interior Euro Module: 3606209 - White
3606210 - Black
