

Euromod—HTMI Connector

Standards, Approvals & Directives

2011/65/EC—RoHS Directive

Description

HDMI (High Definition Multimedia Interface) is a audio/video interface for transferring video data (data compressed) and audio data from a HDMI compliant device.

Features

- Designed to support video resolutions of 1080p and beyond, including advanced display technologies like 3D and 4K.
- Convenient way to connect your HDMI display and television without cable mess coming out the wall.
- Features a female jack with 160mm cable (including jacks) with another female jack on the back, allowing the HDMI cable to be connected within the wall

Availability

All Euromod outlets are available for all our collections of wiring accessory plates and can be specified to contain single or multiple outlets depending upon requirement.

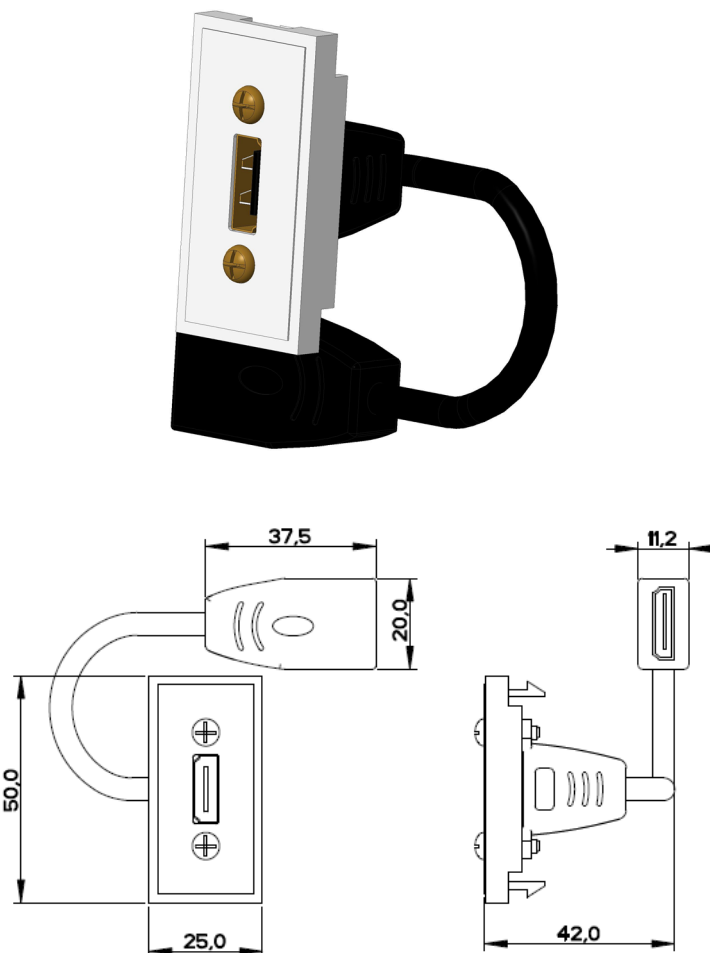

The Classic Collection takes advantage of plate mounting the clip-in Euromods, eliminating the use of a grid. Modules are supplied separately.

The Infinity Collection plates and grids are supplied together whereas the modules are supplied separately.

The Penthouse Collection supplies the Euromods, plates and grids individually.

Finishes

The HTMI module is supplied in either Black or White polycarbonate, complementing the chosen plate finish.

Recommended Box Depth:

47 mm

Metal boxes to BS4662.

Ordering

Interior Euro Module: 3606205 - White
3606206 - Black
