**MADE IN  
BRITAIN** 

## About Wandsworth

Since 1904, Wandsworth Electrical has been a leader in British design and innovation, designing and crafting premium electrical accessories in the UK. Built on a long tradition of British craftsmanship, we have focused on performance, style, and precision for more than 120 years.

We are proud to continue manufacturing in the UK. Every product is carefully made at our British facility, allowing us to maintain exceptional standards of finish, reliability, and durability. Our team of experienced professionals includes designers, engineers, craftspeople, and customer service specialists. With all expertise in-house, we create bespoke solutions that support modern design without compromise.

Today, as part of the Gira family, we bring together British heritage and global innovation, continuing to create beautifully designed, high-performance electrical accessories for modern interiors.

## Part of the Gira Family

In 2022, Wandsworth became part of the Gira family, giving us access to Gira's advanced technology and the support of a leading European innovator in electrical accessories and smart building solutions.

Gira is a global leader in intelligent building technology, creating products that combine innovation, ease of use, and elegant design. With a legacy of quality and engineering, Gira continues to set the benchmark for intelligent, intuitive building control across the world.

## European Collection

The European Collection brings Wandsworth's expertise in British Design and Innovation to the European market. Designed and crafted to meet European standards and preferences, this range combines refined design with precision engineering.

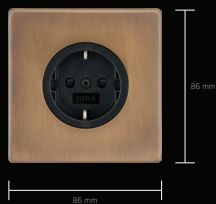

The collection includes switches, sockets, and electrical accessories, all made from solid brass and available in a wide choice of finishes. Each piece is designed to feel considered, tactile, and timeless — enhancing interiors by complementing its unique interior design scheme.

The European Collection is offered across three distinct design lines, allowing for consistency throughout a project or clear contrast where desired. From understated, low-profile designs to bolder statement plates, each collection balances form, function, and detail.

## Collections

The European Collection is available in three elegant design lines, all handcrafted from solid brass. Each collection combines refined craftsmanship with modern design, offering switches and sockets that combine style, function and quality.

COLLECTIONS

## Penthouse

Penthouse is defined by its clean, screwless design and elegant rounded corners. With a slim 3mm face plate, it offers a refined, understated presence suited to timeless interiors.

Available across a selection of finishes, Penthouse can be specified across our full range of bespoke solutions, allowing complete design consistency throughout a project.

COLLECTIONS

## Penthouse<sup>2</sup>

Penthouse<sup>2</sup> is the evolution of our original screwless design. Featuring crisp, squared corners, it introduces a more contemporary character while maintaining the same slim profile and precision detailing.

A chamfered edge option is available, offering a subtle detail while maintaining the design language. Penthouse<sup>2</sup> is offered across a selection of our finishes and supports our bespoke services and capabilities.

Penthouse<sup>2</sup> Collection 2G Ringless Bell Push in Burnished Brass

COLLECTIONS

## Penthouse<sup>2</sup> 95

Penthouse<sup>2</sup> 95 is designed to make a statement. With a larger plate size and strong, squared edges, it brings a bold presence and architectural feel to interiors.

Designed to match the size of the Gira Pushbutton Sensor 4, the 95 Range allows smart control to sit perfectly alongside other switches and sockets, creating a balanced and cohesive wall layout.

A chamfered edge option adds further flexibility, offering a softened, elevated look, allowing the design to be tailored to the space. Available in a selection of finishes and fully compatible with our bespoke solutions, Penthouse<sup>2</sup> 95 combines scale, detail, and performance.

## Finishes

Every finish in the European Collection transforms solid brass plates into objects of subtle beauty and refined character. From silver to brasses and bronzes, our metal finishes have been carefully curated to work with any interior design scheme.

Crafted in Britain with precision and care, the finishes celebrate the natural qualities of the metal, giving switches and sockets a premium feel that complements contemporary, classic, or transitional interiors.

The European Collection is also available with our **Bespoke Finish** services, allowing finishes to be tailored to your project or vision.

## Switches

Each switch style in the European Collection is designed to offer a distinct look and feel, while delivering reliable performance and intuitive control. From classic detailing to contemporary smart integration, every option is crafted to complement the surrounding interior and required functionality.

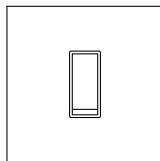

### TOGGLE SWITCHES

A timeless design with a tactile feel, our toggle switches bring character and clarity to any space. Available in ringed or ringless designs, they can be specified for standard on/off use or with retractive action for dimming and smart control systems.

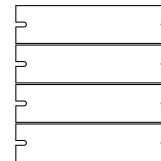

### BELL PUSH SWITCHES

Compact and purposeful, bell push switches introduce a subtle point of detail. Offered in ringed and ringless designs, they are ideal where a momentary control is required, combining precision with a refined aesthetic.

### ROCKER SWITCHES

Rocker switches offer a clean, modern appearance with smooth, effortless operation. Suitable for both standard switching and retractive functions, they provide a versatile solution for contemporary interiors and integrated control.

### PUSHBUTTON SENSOR 4 ROCKERS

Designed specifically for the Gira Pushbutton Sensor 4, these finished metal rockers bring a cohesive, high-quality appearance to smart control systems. They allow advanced functionality to sit seamlessly within the wider European Collection.

## Sockets

Designed in partnership with Gira, our Schuko socket brings precision engineering and timeless design to the European market. Crafted from solid brass and finished with the same attention to detail as the rest of the European Collection, it delivers a seamless blend of style and function.

The socket is designed to integrate perfectly with our switches and plates, allowing a cohesive wall layout that works across a variety of interior design schemes.

Reliable, durable, and visually refined, it reflects the same commitment to quality and performance that defines every element of the European Collection.

## Smart Technology Integration

The European Collection is designed to work seamlessly with a wide range of smart control systems, including Gira One, KNX, and other leading platforms. Our switches and plates provide more than style, they can deliver intelligent control over lighting, blinds, scene settings and more, allowing spaces to adapt to every moment and mood.

With carefully considered design and precise engineering, smart functionality sits naturally within the premium aesthetic of the European Collection, combining modern convenience with timeless craftsmanship.

## Bespoke

The European Collection allows designers, homeowners, and clients to tailor electrical accessories with precision, offering a range of bespoke options that combine premium design with functionality to match any project or specification.

### CUSTOM PLATE DESIGNS

Custom plates are available in a range of sizes, layouts, and design combinations when used with compatible back boxes. This allows complete flexibility to create tailored plates that are fully integrated, functional, and consistent with the premium standards of the European Collection.

### CHAMFERED EDGES

For the square-edged Penthouse<sup>2</sup> and 95 Range, chamfered edge options add subtle, architectural detail. This refined profile delivers a crisp, modern finish while complementing both traditional and contemporary interiors.

### SWITCH DESIGNS

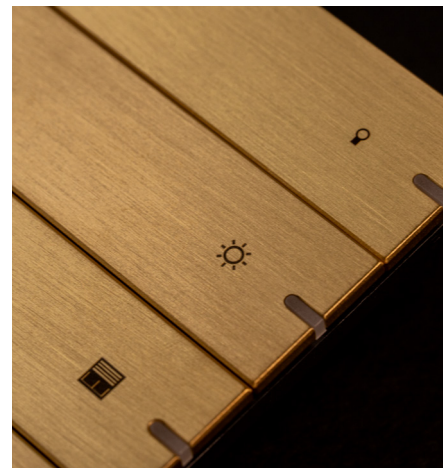

The European Collection offers a range of switch designs to suit different aesthetics and interior styles. Ringed switches offer a classic, traditional look, while ringless switches create a sleek, minimalist appearance. Alongside these, a selection of designer toggles adds tactile detail and refined visual character, allowing our switches to be tailored to the finest details.

### BESPOKE FINISHES

A wide selection of finishes allows the European Collection to harmonise with other architectural elements. Our Bespoke Finish services enable custom tones, specialist patinas, and finish matching to hardware or specific colours, offering enhanced control over colour and texture.

### LASER MARKING SERVICE

Our in-house laser engraving service allows personalised detailing, from text to symbols, transforming switches and plates into refined, functional design features that integrate seamlessly into residential or commercial spaces.
